

The Face of

Vein Specialists

Vein Treatment Clinic, Dr. James Chalk

As a native of the DFW area with deep family roots in Fort Worth and Arlington, I'm proud to serve the community that shaped me. My training in residency and fellowship gave me extensive experience in diagnosing and treating vein diseases using the most advanced, minimally invasive techniques available today. What truly sets me apart is the combination of being a board-certified vascular surgeon and offering a comprehensive approach that goes beyond leg veins to include evaluation and treatment of central venous pathology. Patients return because they know they'll receive attentive, individualized care from a team that values clarity, collaboration, and genuine partnership. We take the time to understand each patient's concerns, tailor their treatment, and deliver proven results that improve both comfort and confidence. PICTURED: Dr. James Chalk.
